ABOUT SAP FICO

SAP FICO is the important module of ERP and both FI and CO modules store the complete financial transaction data of an organization. SAP FI deals with overall financial reporting and accounting, while SAP CO focuses more narrowly on planning and monitoring costs. SAP FI is the important module of all SAP implementations

SAP FI (Financial Accounting) is used for external reporting i.e. Balance sheet, Profit and Loss statements. SAP FICO Module integrates with various other SAP Modules such as MM (Materials Management). **Infobyte Computers** offers SAP FICO (MM) Course, in this course you will learn about the General ledger accounting, accounts receivable, accounts payable, and Profit Center etc. SAP FICO is to help companies generate and manage financial statements for analysis and reporting, as well as to aid in effective business planning and decision-making.
